MEMORANDUM FOR: SA/DD/R

SUBJECT :

I sent the following information to AD/OSA regarding my impressions of I would be glad to talk this over with you at your convenience.

"I visited with the people at was not there. His deputy showed me around and discussed the situation. I also make reference to a recent cable (IN 74630) which brings up the basic problem that faces As you know, they are pretty far out on the command and logistics chain, and I believe suffer considerably from this arrangement. They are operating on such a shoestring basis in the way of facilities and equipment that one might question the over-all prudence of feeding IDEALIST products to them. I feel rather strongly that role, control and support should be the subject of a special study, leading to some positive change in the present arrangements. Fundamentally, I believe they should either be phased out or supported and managed in a proper manner. Will you please initiate necessary action to provide such a study with appropriate recommendations."

101
EDWARD B. GILLER
Assistant Deputy Director
